

Molecular Express, Inc. now offers a line of vaccine research and development tools for academia, biotech, pharma, government research facilities and grant awardees. Our products are designed to be easy to use and achieve superior results. We hope our products become an important part of your Research and Development Toolbox.

### **VesiVax® Conjugatable Adjuvant Lipid Vesicles Kit**

Using the VesiVax® system, it has never been simpler to test your antigen. The VesiVax® TLR line of kits provide a set of adjuvants that are designed to generate consistent results while eliminating potential side effects of conventional adjuvants such as alum

**Features of the Vesivax kit:**

**Easy to use**

**Formulate and test within hours, not days or weeks**

**Just mix and filter**

**Cost effective**

**Reproducible conjugation efficiencies**

**Simplifies vaccine development process**

**Stimulates cellular and humoral responses**

**cGMP compliance capability**

**Kits Available –**

**VesiVax® TLR4 Conjugatable Adjuvant Lipid Vesicles Kit**

**VesiVax® TLR2 Conjugatable Adjuvant Lipid Vesicles Kit**

**VesiVax® TLR0 Conjugatable Adjuvant Lipid Vesicles Control Kit**

**... and coming Soon! kits for TLR3, TLR7/8 and TLR9 !**
